

Easy Responsive Images

```
.float-left {  
    float: left; /* when you  
    float an element, you generally  
    need to "clear" the following  
    element to tell it how to  
    behave next to the floated  
    element */  
    margin: 0 5px 5px 0;  
    width: 100%; /* responsive  
    image */  
    height: auto;  
}
```

How To Create Responsive Images

Step 1) Add HTML:

Example

```

```

Step 2) Add CSS:

If you want the image to scale both up and down on responsiveness, set the CSS `width` property to 100% and `height` to auto:

Example

```
.responsive {  
    width: 100%;  
    height: auto;  
}
```
