Q: is this Inline or Internal CSS?

A: Internal-
The format is the
same as a separate
.css file, but
incorporated in
the .html file within
a style element

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Let's Roooll</title>
    <style>

    .lyrics{
        text-align: center;
    }

    p {
        display: flex;
        justify-content: center;
        transform: scale(.5);
        font-size: 50px;
        font-family: 'Courier New', Courier, monospace;
        font-weight: bold;
        color: white;
        -webkit-text-stroke: 1px black;
        cursor: pointer;
        transition: transform 500ms;
    }

    p:hover {
        color: yellow;
    }

    p:hover, p:focus, p:active {
        transform: scale(1);
    }
```
